

# The Status and Trends of the HIV/AIDS Epidemics in the World

Provisional Report  
5-7 July 2000

MAP receives financial support from:

Joint United Nations Programme on HIV/AIDS  
**UNAIDS**  
UNICEF • UNDP • UNFPA • UNHCR  
UNESCO • WHO • WFP • WB

The Joint United Nations Programme on HIV/AIDS  
(UNAIDS)

The United States Agency for International  
Development (USAID)

## **Acknowledgements**

**The Joint United Nations Programme on HIV/AIDS (UNAIDS) for supporting participants from the various countries.**

**Japanese Foundation for AIDS Prevention (JFAP) for its financial support for the MAP network's activities, including Durban MAP Symposium facilities.**

**Dr. Alan Whiteside and the HEARD project staff at the University of Natal for making all the local arrangements for the venue and logistics.**

## **Monitoring the AIDS Pandemic (MAP) Network**

MAP is a collegial network of internationally recognized technical experts seeking to assess the status and trends of the global HIV/AIDS pandemic. MAP was created in 1996, through the collaboration of the AIDS Control and Prevention (AIDSCAP) Project of Family Health International, the Francois-Xavier Bagnoud Center for Health and Human Rights of the Harvard School of Public Health, and the Joint United Nations Programme on HIV/AIDS (UNAIDS).

MAP's more than 100 members in 40 countries are epidemiologists, modelers, economists, and social, behavioral, public health and international development specialists, recruited through a nomination process and currently guided by an Interim Global Steering Committee.

MAP workshops and membership meetings are held in conjunction with regional and international HIV/AIDS conferences. This enables MAP to function on a small budget and to distribute results from its analyses promptly to conference participants. Specific workshops are convened as needed, with expertise drawn from MAP members and other invited experts. Regional experts are encouraged and supported by MAP in the collection, analysis, synthesis and dissemination of regional information, which is then incorporated into MAP's global reports. AIDS service organizations and regional networks of people living with HIV/AIDS are invited to participate in MAP workshops.

MAP works toward building consensus in an atmosphere of collegiality, cultural sensitivity, and mutual respect for conflicting points of view. It functions on the basis of volunteerism and personal and institutional contributions, with limited financial support from international organizations, including UNAIDS, and thus provides an independent perspective on issues raised by the HIV/AIDS pandemic.

The reports represent the views of the individual participants and not the organizations from which they are affiliated.

## Table of Contents

INTRODUCTION .....	1
STATEMENT OF THE GLOBAL NETWORK OF PEOPLE LIVING WITH HIV/AIDS (GNP+) .....	2
THE AIDS PANDEMIC AT THE START OF THE 21 <sup>ST</sup> CENTURY .....	3
• Global and regional review .....	3
• The demographic impact of AIDS .....	10
• AIDS deaths cause reduction in population growth .....	10
• International development goals will not be achieved due to HIV/AIDS .....	11
• AIDS mortality will produce population structures never seen before.....	12
• Data on HIV infection rates and mortality do not tell the whole story.....	12
• Epidemics in Russia and the other Newly Independent States, China and Vietnam: opportunities for focused prevention among injecting drug users and sex workers.....	14
• How reliable are antenatal clinic sentinel surveillance data .....	16
HIV/AIDS IN INDUSTRIALIZED COUNTRIES: HAVE WE DONE ENOUGH? .....	18
• Reduced morbidity and mortality due to improved treatments .....	18
• Increasing numbers of people living with HIV/AIDS in most industrialized countries.....	20
• Risk behaviors on the rise .....	20
• Vulnerable populations increasingly affected.....	20
• Challenges for the future.....	21
BEHAVIORAL SURVEILLANCE IS NOT ENOUGH.....	23
• What is behavioral surveillance .....	23
• Advantages of doing “rigorous” behavioral surveillance .....	24
• What behavioral surveillance can and can’t deliver .....	25
• The role of other behavioral data collection techniques .....	26
• Recommendations.....	26
MONITORING THE COST OF CARE FOR HIV/AIDS.....	27
DURBAN MAP SYMPOSIUM PARTICIPANTS .....	31
