

Join five of the nation's leading researchers of "HIV Controllers," participants of the "Controller" research studies, & Shanti L.I.F.E. Institute staff for

Unlocking the Mystery of the HIV Controller

October 13, 2009 • 8:30-4:00pm
347 Dolores Street • San Francisco

As we explore

- How some HIV+ individuals are able to suppress HIV naturally without the use of medications, and what science can learn from studying these HIV controllers.
- What psycho-social issues can play a role in HIV disease progression, and what HIV+ individuals can do, starting today, to support their immune functioning and health.

Program Includes:

- Researcher Panel Discussion and Q&A session with:

Stephen A. Migueles, M.D.
CDR, USPHS, Staff Clinician
Laboratory of Immunoregulation,
NIAID, NIH

Jay Levy, Ph.D.
Director, Laboratory for Tumor
and AIDS Virus Research, &
Professor of Medicine, Depart-
ment of Medicine, University of
California, San Francisco

Barbara Shacklett, Ph.D.
Associate Professor, Department
of Medicine, Microbiology &
Immunology, University of
California, Davis

Peter Hunt, M.D.
Assistant Professor of Medicine, University of
California, San Francisco & Attending Physician,
Positive Health Practice, SF General Hospital

Doug Kwon, M.D., Ph.D.
Post Doctoral and Infectious Disease Fellow,
Ragon Institute of MGH, MIT & Harvard
Massachusetts General Hospital

- Presentation by L.I.F.E. Institute staff on how to support immune functioning by attending to the bio-psycho-social Cofactors that can impact HIV+ disease and health progression.
- Roundtable discussions with Zephyr Foundation founder Loreen Willenberg, care providers, people living with HIV/AIDS, and a special guest.
- Continental breakfast and lunch provided. Panel discussion begins at 9am.

Space is very limited. To register for this free event, please visit www.shanti.org/life or contact Tiko Lieou at (415) 674-4718.
